

UConn-NSF summer school on saturation and EIC

Saturday 05 August 2023

Student Lectures - GS-119 (10:50-13:00)

time	[id] title	presenter
10:50	[5] D. Frenklakh: Real-time nonperturbative dynamics of jet production in Schwinger model	
11:10	[6] Eric Kolbusz: Entanglement negativity of quark pair angular correlations in the proton	
11:30	[7] Victor Lopez Pardo: Finite temperature generalization of QCD potentials	
11:50	Short break	
12:00	[8] Carlisle Casuga: Inferring the initial condition for the BK evolution	
12:20	[9] Brandon Manley: Orbital Angular Momentum at Small-x revisited	
12:40	[10] Jeremy Borden: Analytic Solution for the Revised Helicity Evolution at Small x and Large N_c : New Resummed Gluon-Gluon Polarized Anomalous Dimension and Intercept
