Deleting a repository

Warning: These steps will permanently delete the repository, wiki, issues, and comments. This action cannot be undone.
Please also keep in mind that:
Deleting a private repository will delete all of its forks.
Deleting a public repository will not delete its forks.
Deleting all of your private repositories will not downgrade your account to a Free plan.
Forks of private repositories don't count against the allotted private repositories for your payment plan.

For more information, see "What happens to forks when a repository is deleted or changes visibility".

1 On GitHub, navigate to the main page of the repository.

2 In the repository's right sidebar, click **\$ Settings**.

3 Under Danger Zone, click **Delete this repository**.

4 Read the warnings.

- **5** To verify that you're deleting the correct repository, type the name of the repository you want to delete.
- 6 Click I understand the consequences, delete this repository.
