RENAMEIMG A GITLAB PROJECT

http://www.phys.uconn.edu/~rozman/Courses/m3510_18f/

Last modified: September 8, 2018

To rename a project/repository, navigate to your project and click on the Settings tab at the bottom left side of your screen, next select General:
On the next screen select *Advanced settings* at the bottom.
On the next screen, navigate toward the bottom of the page and update the information in two places in the Rename repository section.
